

Restore the Beauty That is You

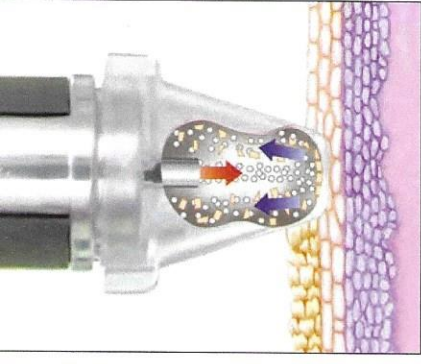

Leave the years and all the sun behind. It's time to treat your skin to Parisian Peel[®], the gentle approach to skin renewal. The Parisian Peel process smooths and freshens your skin, the way the French have enjoyed for years.

Renew Your Skin Quickly and Gently

It's not a chemical, not a laser, not a surgical procedure. Instead, a gentle Parisian Peel treatment takes about 30 minutes after which you can return immediately to your daily activities. You'll feel minimal discomfort, only the glow of newer fresher skin. The Parisian Peel process can reduce or even erase your fine lines and wrinkles, age spots, scars or other superficial blemishes.

Treatment is Personalized for You

It usually takes 5 to 10 treatments to get the best results. Talk with your physician about a treatment plan that's right for your skin type and condition. Because the Parisian Peel process is so gentle, you can have as many treatments as you need without worrying about side effects.

Treatment is Simply Effective

The Parisian Peel process is safe and affordable because it's so simple. A precision handpiece is used to direct a stream of very fine crystals and mild suction exactly where needed on your skin. A crystal free diamond particle embedded tip may also be used. The gentle abrasive action combines with the suction to remove the dead outer layer of your skin while bringing smoother, softer skin to the surface. The Parisian Peel process works equally well on all colors of skin.

What Can Be Treated

- Sun damaged skin
- Age spots
- Superficial pigmentation
- Fine lines and wrinkles
- Enlarged or oily pores
- Blackheads and whiteheads
- Acne scars

"After one Parisian Peel treatment, my face felt smoother and the fine lines had all gone away. It was very pleasurable, like a little vacuum cleaner just sweeping away the years. Parisian Peel is easy, inexpensive and there's no down time..."

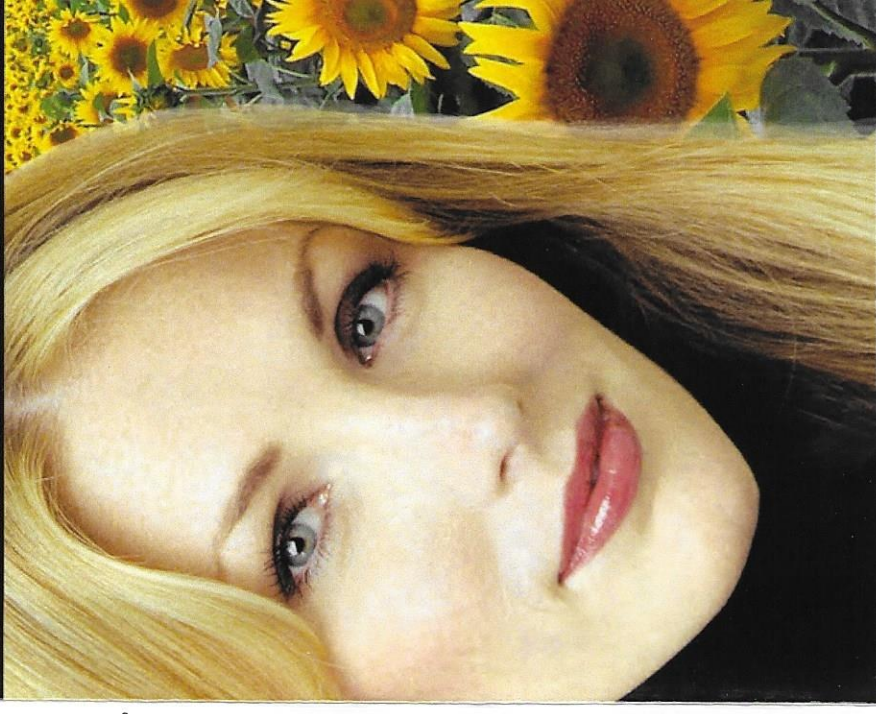

Bonnie Young - Acct. Executive

If you have any questions about this procedure, please ask your physician, aesthetician or a trained office or spa technician. The information in this pamphlet does not dictate an exclusive course of treatment or procedure to be followed and should not be construed as excluding other methods of practice. Variations taking into account the needs of the individual patient, resources and limitations unique to the type of practice may be appropriate.
